

ARTHUR(HAONAN) QIU

The Chinese University of Hong Kong(SZ), No. 2001, Longxiang Road, Shenzhen
+86 18268551624 ◇ 115010214@link.cuhk.edu.cn

OBJECTIVE

My research interests: Generative Adversarial Networks(GAN), Computer Vision(Image Synthesis, Super-Resolution, Style Transfer). To concentrate on research, I gap one year now and will go back to school next year (after summer). Now I am finding a summer research intern position (prefer to GAN related topics) for future PHD application.

EDUCATION

Bachelor of Engineering in Computer Science The Chinese University of Hong Kong, Shenzhen, CGPA: 3.63/4.00, MGPA: 3.97/4.00	Aug 2015 - May 2020
Summer Transfer University of California, Berkeley, CGPA: 4.00/4.00	Jun 2017 - Aug 2017

SKILLS AND INTERESTS

Skills	Python(Pytorch), C++(OpenCV),
Interests	Generative Adversarial Networks, Computer Vision

PUBLICATIONS

Two-phase Hair Image Synthesis by A Self-Enhancing Generative Model Haonan Qiu, Xiaoguang Han, Chuan Wang, Hang Zhu, Xiangyu Zhu, Jinjin Gu (CVPR2019 in process)

Unmanned Aerial Vehicle (UAV)-Assisted Unmanned Ground Vehicle (UGV) Systems Design, Implementation and Optimization Yingxin Wei, Haonan Qiu, Yuanhao Liu, Jingxin Du and Man-On Pun* in ICCV2017

INTERNSHIP

SenseTime Super-Resolution Group <i>Research Intern</i>	Sep 2018 - Present
---	--------------------

- Finish the paper 'Two-phase Hair Image Synthesis by A Self-Enhancing Generative Model'.
- Reproduce some super-resolution algorithms.
- Explore how to make full use of GAN to solve the challenge from super resolution in real scenes.

Shenzhen Research Institute of Big Data <i>Research Assistant</i>	Jan 2017 - Sep 2018
---	---------------------

- Paper retrieval (hundreds of papers) and presentation (main topics are GAN and related application).
- Create a new dataset. Do experiment for existing models in baseline. Design and test the new models.
- Research for Sketch2Hair. Current performance is far more than all other methods. Paper is submitted.

PROJECTS

Selfie Style Transfer Software Development <i>Algorithm Engineer</i>	Feb 2018 - May 2018
--	---------------------

- Transfer human face into cartoon or animal style by Neural Style and Cycle-GAN with existing methods.

Unmanned Aerial Vehicle -Assisted Unmanned Ground Vehicle Systems <i>Algorithm Engineer</i>	Jun 2017 - Dec 2017
---	---------------------

- Optimize route for the unmanned ground vehicle. Correct the route with Kalman Filter.

- One paper accepted by ICCV (responsible for the algorithm part).

CUHK(SZ) Wechat Campus Card Development

Jun 2017 - Oct 2017

Front-End Engineer

- Learned the Wechat mini program language and developed CUHKSZ mini program in two months.
- More than two-thirds of students were our users and won the Digital Star Award by Tencent.

Form Reader and Handwriting Characters Recognition Software

Jan 2017 - May 2017

Algorithm Engineer

- Designed a form reader software which could use phone to replace scanner for Admissions Office.
- Developed some new functions about processing the data on forms automatically.

HONORS AND ACTIVITIES

Member of Dean's List	2016, 2017, 2018
Undergraduate Research Award	2016, 2017, 2018
Undergraduate Student Teaching Fellow (Teaching Assistant, 3 semesters for Python & C++ lab)	2016, 2017
Academic Performance (AP) Scholarship	2018
Tencent WeChat Campus Card "Digital Star"	2017
